The following points correspond to the numbers on Annex A.

Point # 1 Radio Antenna Tower: This radio antenna tower is of steel lattice construction, between 40 and 50 m. high, and 10 m. wide at the base. It tapers off into a peak at the top. (Top of antenna had a whip mast about three to four meters high.) The tower was supported by a concrete base about 30 cm. high, and 13 x 13 m. wide. There were about six lights on this tower, some red and some green.

# 2 Radio Antenna Tower Building: Known as Radio Gdynia (a commercial station). This was of concrete construction, about 7 to 10 m. high, 4½ to 5 m. wide, and 13 m. long with a shingle, deck type tile covered roof. There were about three to four wire cables leading from the antenna tower to building. [redacted] a receiving and transmitting station for ship to shore communication. This building was maintained by about four or five civilian workers. The area including the building and radio tower was surrounded by a three or four steel strand wire fence about 4 m. high and 40 m. long. Entrance was gained by means of a wire gate. The area was always patrolled by an armed guard who belonged to the Polish Youth (Związek Młodzieży Polskiej --ZMP). While aboard the SS KRAKOW, clear text messages were received from Radio Gdynia regarding weather, berths, docking, ports, and personal messages. [redacted] this station communicated with stations in Warsaw, Krakow, Szczecin, Poznan, and other cities, as well as with merchant marine ships and fishing boats.
